**Subject: Acceptance of Foreign Supplemental Type Certificate
No. SA01434WI-D (issued by FAA).**

- References:
1. Collins Aerospace reference Num. CL-190170, application package for SA01434WI-D STC acceptance process, in reference to major alteration for installation of the Rockwell Collins Global Positioning System (GPS-4000S) in Part FAR 23 aircraft. Colombian CAA (UAEAC) Reference: 2020001810, Dated January 10, 2020.
 2. UAEAC reference No. 5106.109-2020001697 dated January 21, 2020. UAEAC acceptance process of STC SA01434WI-D. (RAC 21, § 21.515).
 3. Collins Aerospace reference Num. CL-200030 (February 19, 2020), Collins Aerospace confirms that foreign validation contact will supply the design change and/or maintenance instruction changes to the Colombian Authority (UAEAC), if an STC is revised or amended. (Technical Documentation)
 4. Colombian Civil Aviation Regulations, RAC 21. § 21.515

Dear Mr. Terrintong,

According to your application for the acceptance of **FAA Supplemental Type Certificate No. SA01434WI-D**, related to the installation of:

Rockwell Collins Global Positioning System (GPS-4000S) in FAR Part 23 aircraft. Considering that Collins Aerospace has submitted the associated technical documentation, which was reviewed and evaluated under Colombian Civil Aviation Regulations (RAC 21, § 21.515). The Colombian Civil Aviation Authority (UAEAC) accepts the foreign Supplemental Type Certificate No. SA01434WI-D, for major alteration application on Colombian registered aeronautical products, in accordance with airworthiness limitations and conditions stated in the FAA Supplemental Type Certificate.

The aeronautical product must be listed in the respective FAA Approved Model List (AML) of this STC. The SA01434WI-D STC will be entered in the national index of accepted STC. It is important to mention that a copy of the STC and required documents should accompany each installation (RAC 43, § 43.300 (b)).

In addition, please consider that your company is responsible to keep this STC information (The alterations' published documents) updated to guarantee safe operation and support the continued airworthiness of the altered aircraft registered in Colombia.

Any major change of the STC information must be reported and documented to the Colombian Civil Aviation Authority (UAEAC).

The validity of this letter of acceptance expires when the Supplemental Type Certificate approval ceases to exist. If at any point of time, the UAEAC finds that there is a reasonable doubt to indicate that the safety of the aeronautical product is compromised because of an unsafe condition developed in the aeronautical product, UAEAC may cancel the letter of STC Acceptance.

Kind regards,

FRANCISCO OSPINA RAMIREZ
 SECRETARY OF AERONAUTICAL AUTHORITY
 Colombian Civil Aviation Authority
